- Senior Executive Audience
- Primary care and secondary care markets
- Opportunities to buy, build and invest
- Latest market developments

Healthcare Real Estate continues to be the star alternative asset class – join us for the annual LaingBuisson conference at the King's Fund with the leading Healthcare REITs and property investors as we explore the primary care and secondary care markets. This year we are also including developers and architects, looking at progress with the NHS Estates strategy and also involving international healthcare real estate investors.

Sponsored by leading property lawyers CMS, supported by the British Property Federation and in partnership with MSCI (the former IPD index) this conference brings together the sector to give a unique insight into how real estate is key to delivering great healthcare and social care, and where the opportunities are to buy, build and invest.
